WHILE Memorials and Decrees are being published in the Peking Gazette, enjoining on all cofficials in China the necessity of observing the stipulations of the Treaties with regard to foreigners; the mandarins ignored by the populace of that city. One of those periodical outbursts of senseless and causeless enmity to the foreigners, with which all British residents in China are so familiar. has recently occurred in the southern capital. As in most, if not all, other cases of the kind, this exhibition of ill-feeling seems to have been artificially engendered, either by the lower officials or the literati, a class whose animosity to foreigners appears sleepless and unappeasable. How it originated seems involved in some little obscurity, but there is every reason to believe that the American, missionaries, against whom was directed, were not to blame any way. TEETOTALISM IN THE ARMY IN

It must be very gratifying to the honorary secretary, the Rev. J. G. Gregson, to have it is his power to publish ab favourable a report of the progress of the Soldiers' Total Abstinence Association in India, as the one he has been enabled to put forth for the past year. What. perhaps, is most pleasing in the report is the interest taken and the response made to the pleadings of the Association, by the British soldier bimself. It is not so very long ago that the British soldier in India commenced his daily task with a tot of grog. The authorities did not positively order him to drink it, but it was provided for him. And the soldier of those days was as willing to please the authorities he be is in the present day, and as he always will be. It was to the seamen of the Royal Navy that the famous signal "England expects that every man this day will do his duty? was addressed The soldier is, we hope, with his comrade the royal seaman Elways ready to do his duty. This, we think, the Report under review clearly establishes. The Association has met with approval and substantial support, as may be plainly seem on reference to its pages, from those highest in authority in this land; and so, indirectly, the soldier is now provided, by sanction of the authorities, with tes and ooffe in place of rum, and we see from the statistics given, that he is by no means backward in responding to the invitation. It is not to be expected that the whole of the 58,000 British troops serving in India will at once forsake or abake off the habit of partaking of rum to which many have been acquetomed for years; but we are convinced that your by year the consumption of rum will decrease amongst our European army, The annual return shows the number of total abstainers in April last to have been 6,242-more than one-tenth of the British Army serving in India. The writer of the report is desirous of parading this division of 6,000 men before the Commander-In-Chief. We would auggest that a portion of the money which will be devoted to defray the Prince of Wales's expenses might be devoted to assembling this division at the approaching Unup of Exercise for the Downger, acrived in Shanghai on the 21st ult. woo more undertaken to represent their country special inspection of His Royal Highness. - LTHE AMERICANS IN THE SOUTH PACIFIC.

The Post remarks that while Eist has for number of years been the object of agraction to many of our countrymen, as well as to a few Americans and Germans, another group in the South Seas, known as Samos, or the Navigator Islands, has been coveted by our trans tlantic consins, anxious to extend in the South somewhat of that appremacy they already possess the North Pacific through the influence they exercise over the Sandwich Islands, and which latter-group-they-consider it their "manifest destiny" some day to claim for their own altogether. That all the islands of the Pacific must eventually, sooner or later, come under white rule can scarcely be doubted. Mr. Vogs the enterprising Minister of New Zealand, bis Polynesian trading scheme, shadowed fort a twelvementh ago, but now lying temporarily n abeyance, intended, by the inauguration of a general system of trading with the different groups, to prepare them for their being brought under British subjection; but i is by no means unlikely that the United States. may in some cases be beforehand with us. Int hands, however, of those of our great commercial rivals, the inhabitants of the States, the islands of the Pacific are assuredly destined to fail: and although in many respects the Fost would perfer to see the flag of this Empire-wave over them when the appointed time comes for their being brought under white domination, yet it will be quite willing to welcome in proximity to us the standard of that country which in mea and language is so akin to our own. The advance of America in the Pacific whether directly iffected by her Government or brought about by her enterprising citizens, is, unlike the advance of Russia in the East, a step in the aprend of divilization which can cause us no disentisfaction or anxiety, and it will certainly not be for England to exhibit any free to commit their depredations with good America sometimes cutstrips as in progress.

THE PROSPECTS OF FREE TRADE. The commercial treaties, to the number of fifty or sixty, which were concluded after the model of that between France and England in kind of Bengal drug to-day, the quotations for 1860 are about to expire; and it will shortly be which, however, remain the same as last given. seen by the course taken by one European A few chests of Malwa, good drug, have been Government after another in dealing with them placed at \$600, with a concession of ten tuels whether special interests have more power in in weight. determining the direction of legislation and policy than a regard for the welfare of the community at large. The cause of free trade abroad has to be maintained in a series of separate conflicts, and under political and economia conditions greatly differing in different countries. According to the Cobden Club reports, in Austria, and in may of the States of the German Empire, the most strenuous efforts are being made by the Protectionists to procure the reversal of the policy on which the Commercial Treatics were founded. But in the opinion of the writer of the report on the Austro-Hungarian monarchy, the Government is not likely to permit the Protectionists to substitute the interests for those of the nation, while, as to ny, Prince Bismarck is a convinced Free Tender, and so are his principal advisors in commomic matters. The account given of Italy is of a very different character from the reports | from Germany and Austria, for the present ON Italian Government appears inclined to reintroduce the pernicious system of discriminating duties between the products of different countrice. In the United States of America the question of free trade is very little discussed by the press, but the people are said to be fast learning in the school of experience. From Hongkong and Shanghai Bank Shares .- 9 Australia the reports are alike encouraging. In Victoria, the nursery of E otestion, the policy of artificial aids to industry is breaking up and in New South Wales there is no Protectionist party. COAL IN INDIA The chief difficulty standing in the way of railway enterprise in India is the high price of fuel. Mr. Julian Dunvers estimates the average cost of coal on the Bombay lines at 58s, perton, and on the Madras at 70s, per ton. On the other hand, the Hengal railways are supplied at considerably less than half these rates, owing to the active working of coul beds in that presidency. Comparative experiments recently carried on by the acting locomotive superinten ..! dent of the Madras Railway with Australian, English, and Indian coals, gave the following results :- The average consumption per mile was in favour of the Australian, 27.35 lbs. of that sort having been consumed against 31.08 bs. of Indian, and from 80 16 to 32 82 the of English. But in respect to expense. the indigenous production had a great superiority, its cost per mile being four annus nine pie against five annus five pie for lustralian, and seven annas one piè for English This was at a time when Indian Tanhone conf which comes from Bengal, was selling in Madras for 43s. a ton. Subsequently, however, arrangements were made by which the cost price was reduced to about 36s. a ton, and there was every expectation that a still greater reduction would ultimately become possible. As the East Indian and Eastern Bengal lines chiefly owe their financial success to the comparatively low price at which they are supplied with local fuel, the discovery of coal mensures in other parts of Indian movilestly becomes of great importance. At present the Indian Government is sadly hampered in its desire to extend its railway system by the heavy charge to revenue annually entailed through the inability of many QUEEN FIRE INSURANCE COMPANY. lines to pay the full amount of guaranteed inrerest. Did the railways already constructed discharge their financial obligations to the State, the revenue would soon show a substantial extent of 45,000 Dollars on Buildings or on surplus over expenditure, and Government Goods stored therein, at Current Local Rutes, might be encouraged to proceed at a more rapid subject to a Discount of 20 % on the premia. might be encouraged to proceed at a more rapid pace with extensions. Hence it is satisfactory to learn that the newly discovered Reids at Warors, from which the Great tf 8 Hongkong, January, 1875. India Peninsula line hopes to draw its future supplies, are promising well. LOANS TO FOREIGN STATES. The Report from the Select Committee on been much impressed, in the course of their tions exercised by the agent or contractor for a degree our good, understanding with the corrowing country, and our reputation for honesty and good faith should be exercised by uny person who may choose to undertake it, or worse still, to whom the representative of some petty or insolvent State may choose to intrust it. In conclusion, your Committee feel bound to express their conviction that the best security. against the recurrence of such evils as they have described will be found, not so much in legislative ensetments as in the onlightenment of the public as to their real miture and origin. Your ommittee hope that the history of the foreign loans embodied in this Report will tend to enlighten the public, and to rander it more difficult for unscrupulous persons to carry out achames such as those which, in the cases on which it has been the duty of your Committee to report, have ended in so much disoredit and disaster."

CRIME IN NEW YORK. The boldness with which burglars and robbers of all sorts have violated the laws in New York within the last few weeks has led to compurisons between the crime records of New York and London. The latter city, says the Philadelphia Ledger, has three times the popuation of New York, and four times as many policemen, but as New York is compacted son a small island, there are more policemen to the mile of patrol in New York than in London. In 1872 there were 828 burglaries in London, 459 in New York; 52 robberies in London, 36 in New York: 498 grand lurgenies in London. 939 in New York; 9,609 assaults in London, 7,323 in New Yors : 7,217 petty larcenies in London, 3,994 in New York. Relatively, New York had a much worse criminal record than London ne to all crimes, and had an absolutely worse record in burglaries and lurcenies These facts indicate a greater proportion of the criminal classes in the population of New York than in that of London, or else that, because of the absence of concentration of authority and responsibility in the police department of New York-which is governed by a Commission instead of by a single chief-the criminal classes of New York feel themselves a great deal more obsides of escupe.

IMPERIAL QUARTO. ENGLISH AND CHINESE DICTIONARY, WITH THEGO PUNTI AND MANDARIN PRONUNCIATION. n Anglo-Chinese Dictionary, published at the Daily Press Office, Hongkong,

HOR comprehensiveness and practical service this Work stands unrivalled. All the new

words which the Chinese bave of late years been compelled to coin to express the numerous obcots in machinery, photography, telegraphy, and in science generally, which the rapid advance of foreign relations has imposed upon them, are bere given in extense. Each and every word is fully illustrated and explained, forming exersises for students of a most instructive nature. Amoy Both the Court and Punti pronunciations are Formoso given, the accents being carefully marked on Foochow the best principle bitherto attained. The typo: Ningpo graphy displays the success, of an attempt to make the Chinese and English type correspond in the size of body, thereby effecting a vast Hankow and economy of space, achieving a clearness not River Ports previously attained, and dispensing with those | Chefoo and ? vast margins and vacant spaces which have Newchwary heretofore characterized Chinese publications. Tientsin and To illustrate the vast scope of the work, the following facts are submitted for consideration. Ohinese characters, and Medhurst's English Tokohama...... Meers. Lane, Chawford & Johnson & Mr. C. D. Moss. Japan Ga this work contains more than 50,000 English words, and upwards of 600,000 Chinese obaracters. Again, despite all the grammars and other elementary works as yet published, the student of this difficult language absolutely requires examples to display the various applications and equivalents of different words which have one general meaning. Of these examples
